

Explore Craters of the Moon in Winter!

Cross-Country Skiing

The groomed track is 4-7 miles in length with mostly level terrain and gentle hills. Although skiing time varies with ability and snow conditions, most people can ski the entire loop in 2 to 4 hours. There is no charge for skiing at Craters of the Moon.

And feel free to leave the groomed track and venture onto our volcanic slopes to carve some turns!

Snowshoeing

Follow the orange snow poles to explore a 1.5 mile Snowshoe Loop Trail through the monument or venture off of the winter trails and climb a volcano. Free guided snowshoe walks are offered in January and February for the public and school groups. Snowshoes are provided and no previous experience is required.

Winter Camping

Winter camping is permitted in the campground as well as designated parking lots. Backcountry camping is also allowed with a free permit obtained from the visitor center.
